

BROOKLYN PERIODONTICS & IMPLANT DENTISTRY

How we help you afford care

Downtown Brooklyn since 2008 · 26 Court Street, Suite 1507

You get the fee, the treatment sequence, and your estimated out-of-pocket in writing before anything is scheduled.

No surprises, no pressure in the chair. Here is exactly how payment, insurance filing, and financing work at our office.

01

Our insurance team works your claim

We are out of network with all dental plans, so our fee is paid at the visit. Our in-house insurance team then files the claim electronically for you, includes the x-rays, charting, and narrative your plan requires, and follows up on claims that stall.

- Most PPO plans reimburse a portion of out-of-network periodontal and implant care.
- We tell you the expected reimbursement before you schedule.
- You do not chase your insurer. We do.

02

CareCredit and payment plans

CareCredit is accepted for all treatment, including interest-free and extended plans subject to approval. Full-arch implant treatment is commonly financed this way.

- The front desk helps you apply, usually in a few minutes.
- Credit and debit cards, HSA and FSA cards, and checks also accepted.
- You choose the plan length that fits your monthly budget.

03

Treatment phased to your budget

When cost is the constraint, we say so and sequence the work. Stopping active disease comes first, rebuilding can follow later.

- We tell you plainly what is urgent and what can safely wait.
- Each phase is quoted separately, in writing.
- You approve one phase at a time.

A consultation is not a commitment

You leave with a diagnosis, your options in writing including doing nothing, and the numbers. What you do next is decided at home, not in the chair. Call or text us with your plan details before your visit and our insurance team will check your out-of-network benefits first.
